**At OZHAN,**

**We proudly supply leading manufacturers across local and global markets with ingredients they can trust, batch after batch.**

**Our commitment is long term reliability, consistent quality, and responsible production at every stage. Above all, we aim to build lasting partnerships grounded in trust, collaboration, and shared growth.**

# Our History

In 1401 (2022-2023), our activities began with a strong entry into the Russian market; in the very first year, we successfully exported more than 750 tons of apple purée and 600 tons of aseptic tomato paste. In the same year, we established a successful partnership with the reputable Mahram brand, which marked an important step in solidifying Ozhan's position in the country's food industry.

In 1402 (2023-2024), focusing on expanding international markets, Ozhan's products were exported to Germany, the United Kingdom, Spain, Italy, Oman, and Russia. The export of high-quality bell pepper purée, aseptic tomato paste, and apple purée played a vital role in strengthening our presence in European and Middle Eastern markets.

In 1403 (2024-2025), exports to Russia, Iraq, Jordan, Lebanon, and markets in the Middle East and South Africa increased significantly. Collaborations with well-known brands such as Teta helped further establish our products with excellent quality in target markets. Additionally, supplying large quantities of various purées and aseptic paste to major customers demonstrated the trust and credibility that have developed between Ozhan and its business partners.

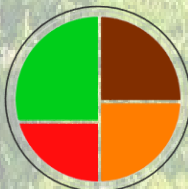

In 1404 (2025-2026), a significant contract was signed with Demko Company of Turkey as part of a commercial partnership that enabled expansion into new markets including Azerbaijan, Jordan, Russia, Armenia, Ukraine, Bulgaria, Serbia, Romania, Spain, and Italy. This cooperation marked a turning point in the development of Ozhan's international activities. Simultaneously, distribution contracts and agency agreements for three regions in Iraq were also finalized.

We are proud to announce that currently, by exporting over 5,000 tons of aseptic and canned tomato paste, 4,000 tons of apple purée, more than 1,500 tons of apple and pomegranate concentrate, and other products such as dates to more than 18 countries worldwide, we have become a key link in the supply chain of our partners.

**Now, at the beginning of a great journey,  
our goal is to become a world class supplier  
worthy of the high quality of Iranian products.**

A vibrant still life of fresh produce including apples, peaches, bell peppers, and pumpkins on a wooden surface. The scene is set on a rustic wooden table with various fruits and vegetables. In the foreground, there are several red apples, some with water droplets, and several ripe peaches. Behind them are yellow and red bell peppers, and a large green bell pepper. In the background, there are pumpkins and leafy greens. The lighting is warm and natural, creating a soft glow. The text 'Puree PRODUCTS' is overlaid in the center, with 'Puree' in a smaller font and 'PRODUCTS' in a larger, bold font, both in white with a green glow effect.
